..The..
Siebenthaler Company
NURSERYMEN

Siebenthaler Avenue and Catalpa Drive
DAYTON, OHIO

Established 1870

LOCATION

The CATALPA DIVISION of our Nurseries is located at the corner of Siebenthaler Avenue and Catalpa Drive, which is three and one-half miles northwest of the center of the city of Dayton.

May be reached by going out Salem Avenue to Catalpa Drive and then north one mile; or out North Main Street to Siebenthaler Avenue and then west one-third mile.

Our MORaine DIVISION is located six miles south of Dayton at Moraine City.

May be reached by going down South Broadway and Springboro Pike, continuing across Route No. 25 to corner of Alexandersville Road and Springboro Pike; or down Lamme Road to Polo Field which lies opposite the east entrance to the Nurseries.

Our MAIN OFFICE is on Catalpa Drive at Siebenthaler Avenue, and may be reached at all times by local or long distance telephone.

Randolph 1154

Please Read Carefully

DIRECTIONS FOR ORDERING:- Write name and address plainly and advise time and method of shipment; otherwise we will use our best judgment and ship by the shortest and safest route.

PRICES:- Prices in this list cancel all previous lists and quotations. They are subject to change without notice and to stock being unsold upon receipt of order. They include packing costs, except on excessively bulky material and are f.o.b. our freight or express station. For local orders they include delivery to customer if within ten miles of our Nursery. Cost of delivery by truck to more distant points will be quoted upon request.

SUMMER PLANTING:- An extra charge is made for balling deciduous plants not marked B&B either in dormant season or in full leaf for summer planting.

TERMS:- Cash with order, except to persons who satisfy us as to their financial responsibility, when accounts will be due in thirty days from date of invoice.

INSPECTION:- A certificate of inspection by the Ohio Department of Agriculture will be attached to each shipment.

LANDSCAPE SERVICE:- We maintain a thoroughly trained landscape organization fully equipped to handle any landscape project including designing, construction, and planting. Ask for special quotations on such work.

GUARANTEE:- All plant materials are warranted to be true to name, up to size specified and in good healthy condition when delivered, otherwise replacement will be made or original amount paid will be refunded. We cannot, however, guarantee the growth of plants not planted by us. This is due to the perishability of such material and the fact that their care and up-keep is beyond our control. Any plants planted by our Landscape Department and given proper care by the owner are guaranteed to grow and thrive satisfactorily for one year from date of planting. Those failing to do so will be replaced without charge the following planting season.

Please Read Carefully

This list of hardy ornamental nursery stock comprises all the worth while varieties of plant material adapted to this section, and will fulfill practically every need for landscape development.

Those items marked "B&B" include the price of balling in the price quoted. During certain seasons of the year other varieties may be successfully transplanted by digging with a ball of earth, for which an extra charge will be made. See schedule below.

This stock is all well grown, frequently transplanted or root pruned, properly sheared and trimmed to retain the natural character of the plant but to improve its density and form and to facilitate transplanting.

In addition to the usual sizes as listed herein, we grow many varieties of shade and evergreen trees into large finished specimens. These are well spaced and carefully grown, and are not to be confused with left-over trees in old nursery rows. These involve the use of special moving equipment and are quoted on pages 77-84, which price includes moving and planting with a large ball of earth.

B & B SCHEDULE

Extra charge for balling and burlapping plant materials not quoted B&B in price list.

ROSES

Strong, two year old, field grown plants of finest quality, in the following varieties:

POTTED PLANTS of most varieties may be had after May 1st at an additional cost of 25¢ each. Our new method of potting roses allows for full development of root growth, since each plant is growing in three times the amount of soil formerly provided.

HYBRID TEA ROSES

	<u>Each</u>	<u>Per Dozen</u>
AUTUMN - Burnt orange overcast with red, fragrant and free blooming._____	.65	7.00

LARGE SPECIMEN TREES

We are prepared to furnish and move trees of extra large size. The caliper measurement is taken at a point twelve inches above the ground surface. These trees are all grown far apart in nursery rows, having been frequently transplanted to insure a good root system and render them especially suited for future moving.

The prices quoted below include moving and planting with a large ball of earth, but are subject to deviation, dependent upon conditions at point of planting, distance, etcetera.

HARDY HERBACEOUS PERENNIALSAND ROCK GARDEN PLANTS

The color, ultimate height and principal season of bloom are given as an aid in arranging pleasing color combinations and in securing a succession of bloom throughout the season.

An asterisk (*) indicates those varieties most suitable for rockeries or alpine gardens.

PAPAVER orientale - Oriental Poppy

Space does not permit listing here all the varieties or Oriental Poppies that we grow (over a hundred named sorts) which is probably the largest collection in America at this time. Here are fifteen varieties, however, that may be depended upon and that cover the range of color very well.

Our special poppy circular containing all the newer varieties will be sent on request to anyone interested.

	<u>Each</u>	<u>Per 3</u>
BETTY ANN. 24 in. (Siebenthaler 1935) This beautiful crinkled flower of La France Pink* has caused more favorable comment than any of our other hundred or more promising new sorts. There are no spots. It is a most profuse bloomer and a single plant makes a veritable bouquet in itself. And more than that, it lasts longer as a cut flower than any other variety so far observed. _____	1.00	2.50
BIG JIM. 36 in. (Siebenthaler 1935) Mammoth, gorgeous flowers of deep maroon, combining the outstanding color of Lula A. Neeley with the sturdy vigorous growth of Joyce. _____	1.00	2.50
HELEN ELIZABETH. 24 in. (Siebenthaler 1935) This is a real acquisition of light La France Pink*. The petals are deeply crinkled and show no evidence of spots or blotches. Just the right shade to plant with light blue delphiniums. _____	1.50	4.00

	<u>Each</u>	<u>Per 3</u>
PAPAVER orientale		
HENRI CAYEUX. 30 in. Veronia Purple*, might be called old rose shading into Burgundy. An early bloomer and good grower with distinctive gray-green foliage. Flowers most attractive where protected from midday sun _____	.75	2.00
HERCULE. 42 in. Immense flower, often nine inches across, of true Scarlet*, borne on extra tall and sturdy stems. A leader in its color class _____	.75	2.00
JOYCE. 48 in. Spectrum Red*, or may be described as cherry-red in color. Flowers are of medium size, borne on tall, perfectly straight stems. We consider it one of the very best garden varieties _____	.35	1.00
LULA A. NEELEY. 34 in. A Neeley introduction and considered very fine. Flowers are of medium size and their color is between Spectrum Red* and Carmine*. Does well as a cut flower. _____	1.50	4.50
MAHONY. 44 in. Oxblood Red* or mahogany in color. Very unusual and a fine garden variety. _____	1.00	2.50
MRS. PERRY. 29 in. The old favorite salmon-pink or Geranium Pink* or Ridgeway. Rather loose growing plant _____	.50	1.25
NEGRILLON. 30 in. A French variety with flowers of a very unusual color, Bordeaux* - between Harmony and Mahony, somewhat of a purplish carmine. The first to bloom after Olympia. It holds its color well if shaded from the hot sun _____	.75	2.00
PERRY'S WHITE. Satiny white, dark maroon base _____	1.00	2.50
PROSERPINE. 36 in. Immense Scarlet Red* flowers borne on heavy, upright stems. One of the best of its class _____	1.00	2.50

	<u>Each</u>	<u>Per 3</u>
PAPAVER orientale		
WATTEAU. 24 in. Shrimp Pink*, or flesh-coral colored, small sized but abundant flowers on compact, well formed plant. This is the finest poppy for border planting	1.50	4.00
WUNDERKIND. 33 in. Considered the finest cerise colored poppy, true Begonia Rose* shade. Well shaped plants and sturdy stems with excellent foliage. Fine for cut flowers	3.50	10.00
WURTEMBERGIA. 38 in. Nopal Red*, or dark scarlet. Large flowers on good stems and foliage. An old favorite	.75	2.00

NOTE: The color descriptions marked * were taken from "Color Standards and Nomenclature" by Ridgway. The numeral following the name denotes the average ultimate height of growth.

FRUIT TREES AND SMALL FRUIT PLANTS

All of our fruit trees are carefully grown, true to name, healthy and well formed. They are graded according to the Horticultural Standards of the American Association of Nurserymen. The caliper is taken two inches above the bud. Unless specially mentioned, the apple, cherry, plum, pear and quince trees are two years old and the peach trees are one year old.

APPLES

	1-4	5-24	25 & Up
	Each	Each	Each
1 1/16 in. diam. 4 1/2-6 ft. _____	1.25	1.00	.85

Summer Fruiting Varieties

MELBA. Solid red. Same quality and appearance as McIntosh. A good variety for family and roadside market use.

YELLOW TRANSPARENT. (Miller) The outstanding yellow summer apple. This type is tall growing and habitually bears good crops of large, golden, juicy fruit.

Autumn Fruiting Varieties

DUCHESS. Dull red, profitable commercial and home use variety. October and November.

MAIDEN BLUSH. Pale lemon-yellow with crimson cheek. Comes into bearing young and is a reliable cropper.

WEALTHY. Handsome appearance and good flavor. One of the finest varieties of its season and especially good for commercial purposes.

Winter Fruiting Varieties

CORTLAND. An improved McIntosh with brighter red fruit. Very juicy and a good keeper.

GALLIA BEAUTY. A superior variation of Rome Beauty. Solid red, large, smooth skinned fruit. November to February.

GRIMES GOLDEN. One of the best pure yellow winter apples for home and commercial use.

JONATHON. An early bearing variety, red, medium size, and very good quality. Tree never large but productive.

NORTHERN SPY. A large striped red apple, crisp, juicy and aromatic.

SOLID RED DELICIOUS. Large, dark red fruit with fine flesh, crisp and juicy, with a delightful aroma. Annual bearer.

WINESAP - Turley variety. Dark, rich red, larger and bears younger than the old Winesap.

APPLES, DWARF

These miniature apple trees are ideal for garden or lawn planting, have the same kind of fruit as the standard varieties of the same name, but only grow to be 8 to 10 feet high and start bearing earlier than the larger trees.

Varieties

BING. Very large, dark brown, almost black; flesh firm, sweet, rich, delicious. One of the most profitable. July.

BLACK TARTARIAN. Very large, black, juicy, rich. June.

EARLY RICHMOND. Medium dark red, juicy, rich acid. best. A dependable cropper. June.

MONTMORENCY. Large, red, productive, ten days later than Early Richmond. Surest cropper for this climate.

NAPOLEON. Sweet cherry, very large, rich, pale yellow with red cheek.

PAUL ROSE. A white sweet cherry of large size, tender and juicy, with rich flavor.

PEACHES

	1-4	5-24	25 & Up
	<u>Each</u>	<u>Each</u>	<u>Each</u>
9/16 in. diam. 4-5 ft. _____	.75	.60	.50

Early Ripening Varieties

- CHAMPION. A large, handsome, early variety, creamy white, with red cheek, sweet, rich and juicy.
- GOLDEN JUBILEE. A new variety that is highly recommended. Mid-season and of unexcelled quality. Yellow flesh with distinct blush.
- HALEHAVEN. Large, beautifully colored, yellow fleshed, freestone peach, two weeks earlier than Elberta. Thrifty grower and very hardy tree.
- ROCHESTER. The fruit is large, yellow, sweet, juicy and of delicious flavor; keeping and shipping well.
- SOUTH HAVEN. It is better than average size, globular, prolific. Its meat is yellow, juicy and delicious; cheek yellow with one red blotch.

Mid-season Varieties

- EARLY ELBERTA. Ripens about a week earlier than Elberta; otherwise the same, or a trifle better quality.
- ELBERTA. Large, yellow, with red cheek; flesh yellow, firm, juicy, of high quality. Exceedingly prolific, sure bearer and hardy. The leading market variety.
- J. H. HALE. Golden yellow with deep carmine blush. Larger, five days earlier, and superior quality to Elberta.

Late Ripening Varieties

- WILMA. The fruit is large as Elberta, its parent, but not quite so elongated; ripens about ten days later.

PEARS

11/16 in. diam. 4-5 ft. _____	1.25	1.00	.85
